

Combining **infrastructure** solutions and  
**consulting** services  
for the **energy and chemical** sector

**Our Service capabilities includes:**

- Agreement and Contract Management solutions
- Aviation and Marine Customer Management solutions
- Bulk & Packaged Product Transportation solution
- Container and Cylinder Management solutions
- Enterprise Pricing solutions
- Terminal Automation Systems Integration (API) solutions
- Downstream & Upstream Solution Template development and roll-out
- Lube Oil Blend Plant and Refinery Manufacturing solutions
- Product Costing and Valuation solutions
- Maintenance and Asset Management solutions
- Outsourced Solution Support
- Project Accounting solutions
- Pilot Infrastructure solutions
- Solution Migration Services
- System Security & Integrity Audits
- Upgrade & Change Management

The long-established JD Edwards specialist, Whitehouse Consultants, has teamed up with Netential, a consulting and infrastructure service provider, to specifically address the requirements of the Energy and Chemical sector.

The partnership brings together the complementary, specialist skills of infrastructure and consulting services. These skills, ranging from expert application knowledge to outsourced remote support services, are designed to meet the unique requirements of both Upstream and Downstream operations.

The Whitehouse and Netential combination provides unrivalled industry experience and can enhance your existing teams and projects to create long term solution value. Our practical experience is vast; including implementing both small (10 user) and large (1000+ user) integrated solutions in Refineries, Lube Oil Blend Plants, Chemical Plants, Depots, Airports and Retail environments, in a variety of geographical locations.

### Agreement Management and Marine Lubricants

Agreement Management enabled a world-leading marine lubricants provider to manage complex marine contracts, pricing product by port and by vessel. Contract adherence was assured by having an accurate, single view of the relationship.

### Container / Cylinder Management

A fast growing Industrial Gas producer needed an effective cylinder tracking and billing tool. In addition, Product Managers benefited from knowing the sales and cost information relating to customers' intended 'end use' of the product.

### Downstream & Upstream Solution Templates

Many multi-site JD Edwards customers have benefited from the use of solution templates. Our experience has been gained both in the development, assurance and end-use of templates prior to roll-out and achieving fast, quality solution implementations.

### Maintenance and Asset Management

A large chemical manufacturing plant in the Far East chose to implement an integrated Maintenance Management System from JD Edwards. They now benefit from a single planning tool where manufacturing knows about planned maintenance.

### Project Accounting

Whether building a new rig or drilling a new well, JD Edwards has been designed to capture information from AFE to purchase encumbrance, providing an upstream operation with all the information to correctly capitalise and then depreciate (DDA) its projects.

### Pilot Infrastructure Solutions

Netential builds and supports short-term infrastructure solutions that are hosted within its data-centre and deployed direct to customers' users. Pilots allow testing and refinement of new technology removing barriers to innovation.
